1. Introduction

This report including the integration of the two sub expert systems in CITEX4 assessment and plant care and also the multimedia for CITEX4. The separate designs for each one of them has been published under the following technical report numbers: TR/CLAES/61/99.3, TR/CLAES/142/2000.5, and TR/CLAES/53/99.1 respectively. The comment in the reviewing reports for each sub system in the corresponding technical reports: TR/CLAES/167/2000.10, TR/CLAES/153/2000.8, and TR/CLAES/180/2000.12 respectively are considered.

The original input screen

The screenshot shows a user interface for plant care input. At the top right, there is a label "نوع البستان" (Type of garden) next to a large empty rectangular input field. Below this, on the right, is a label "الظاهره" (Manifestation) next to another large empty rectangular input field. On the left side, there is a vertical stack of three rectangular input fields. The top field contains the Arabic text "العملية الزراعية المقترنة السابقة". The middle field contains the text "تم عملها" (It was done) above "لم يتم عملها" (Not yet done), with a small downward arrow at the bottom. The bottom field is empty. At the bottom left, there is a small square button labeled "تم" (Done).
