1 System Overview

1.1 System Architecture

1.1.1 Physical Architecture

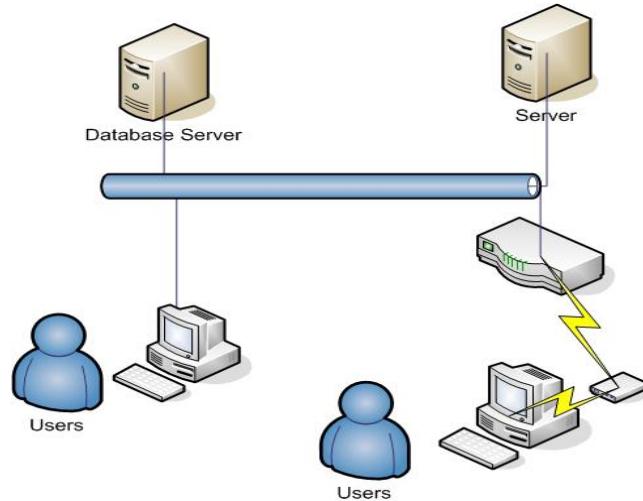

Figure 1 the Physical Architecture

The system is web based and it can be accessed from any place in the world. The application will be put on the server and the database will be in another server.

1.1.2 High Level Logical Architecture

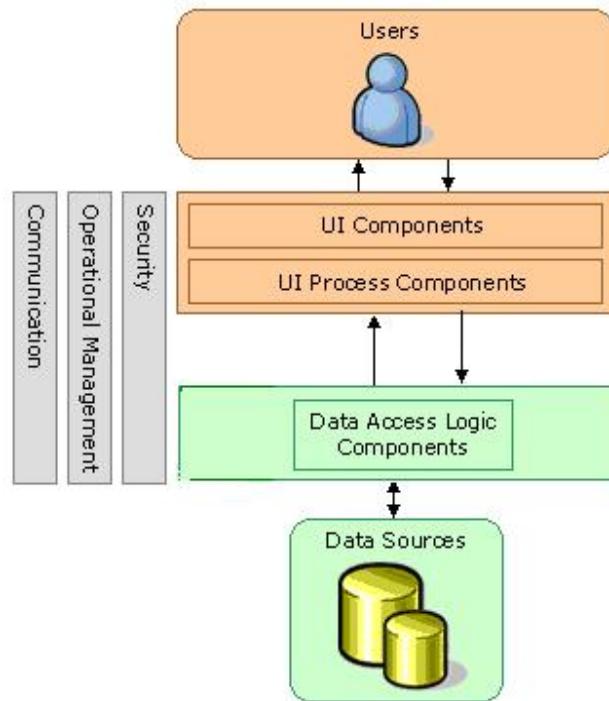

Figure 1 the High level logical architecture

Users will interact with the system through user interface component. We will have two types of users: backend users and front-end users. The backend users have the responsibility for managing the content of the web site. The front-end users include all site visitors.

User interface process component will have the responsibility to check user privileges and to communicate with the database through data access logic component

1.1.3 Domain Object Model/Class Diagram

Class diagram for towards an environment Module

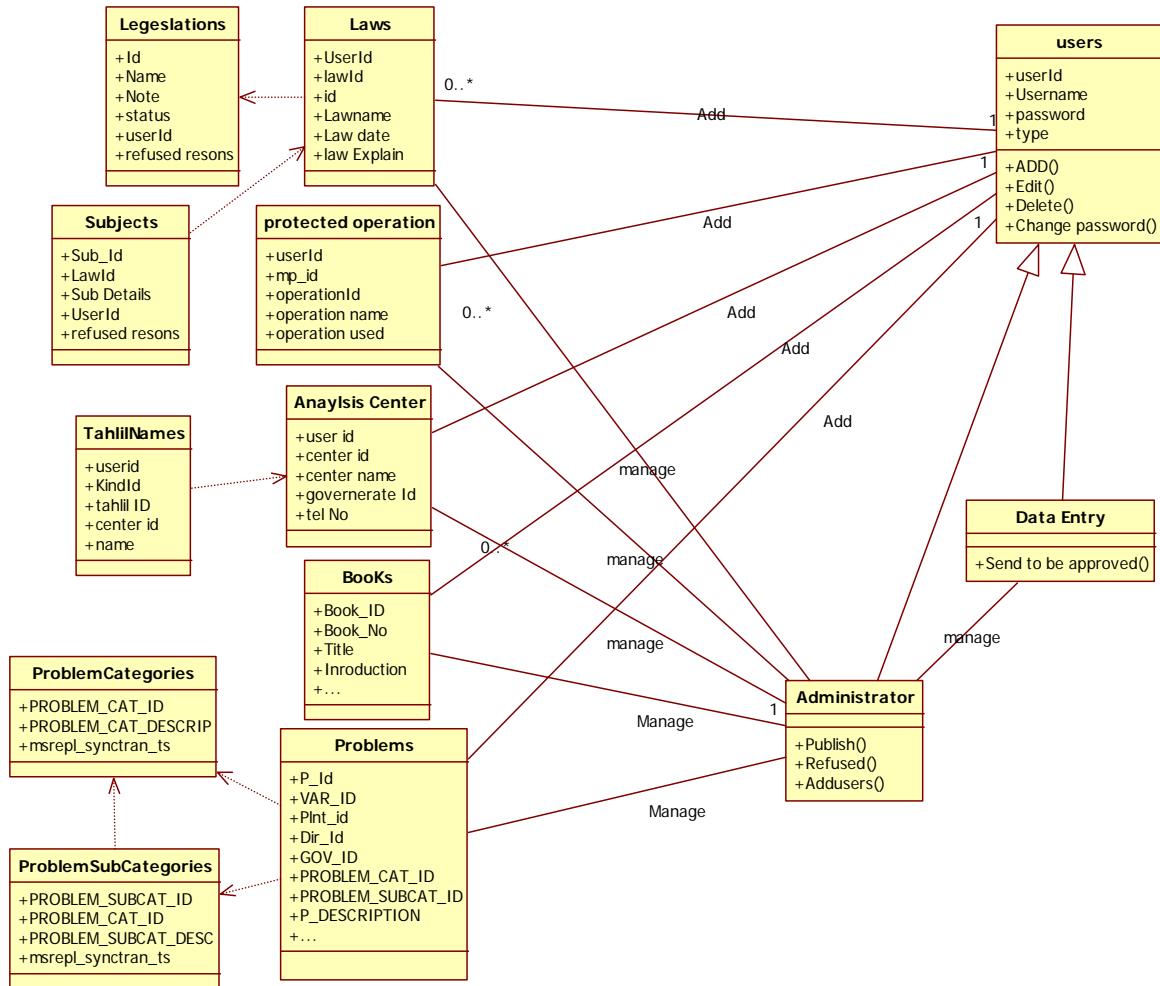

Figure 3 the Class diagram

1.1.4 Towards a clean Environment system Database

The database (DB) for Environment system module .Figure (1) shows Entity relationship diagram for the database

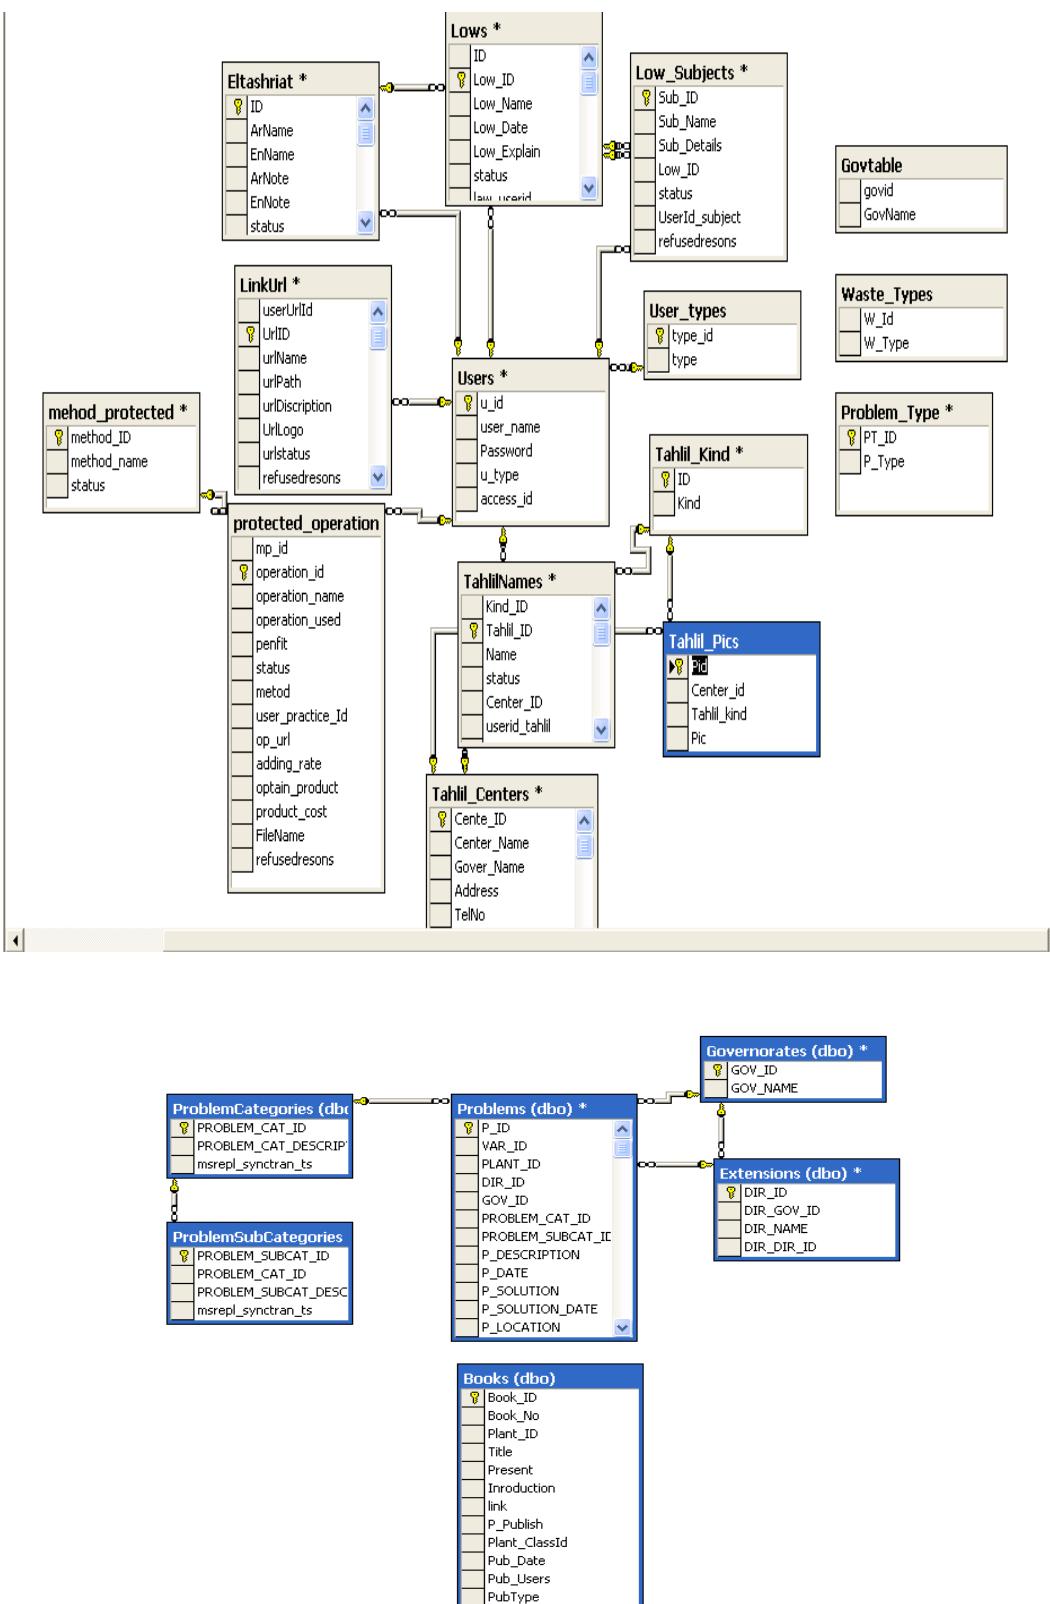

Figure 2 Entity relationship diagram for Environment database design

1.1.5 Data Diagram

1.2 System State & Configuration

1.2.1 System Configuration

```
<appSettings>
  <add key="Env_UploadFolder" value Upload/EnvImages" />
</appSettings>
<connectionStrings>
<add name="EnvironmentConnectionString" connectionString=" Data Source=192.168.1.40;Initial Catalog=environment;User ID=envuser;Password=envpass" providerName="System.Data.SqlClient"/>
<add name="VerconConnectionString" connectionString=" Data Source=192.168.1.40;Initial Catalog=GlobalVerconDBSQL;User ID=verconuser;Password=claes2002"
providerName="System.Data.SqlClient"/>
</connectionStrings>
<system.web>
<pages styleSheetTheme="SkinFile" theme="SkinFile"></pages>
```

1.2.2 External Inputs

- In our module we use VERCON website in uploading the full text of the environment extension document. The fallowing link is used to upload environment pollution and recycle wastes as an environment extension document <http://www.vercon.sci.eg/aindexui/indexdocayman.asp>
- In our module we use VERCON backend for adding environment problems and follow up these problem to be solved and published to my module
http://www.vercon.sci.eg/farm_entryNew/main.asp

1.3 State charts for the workflow

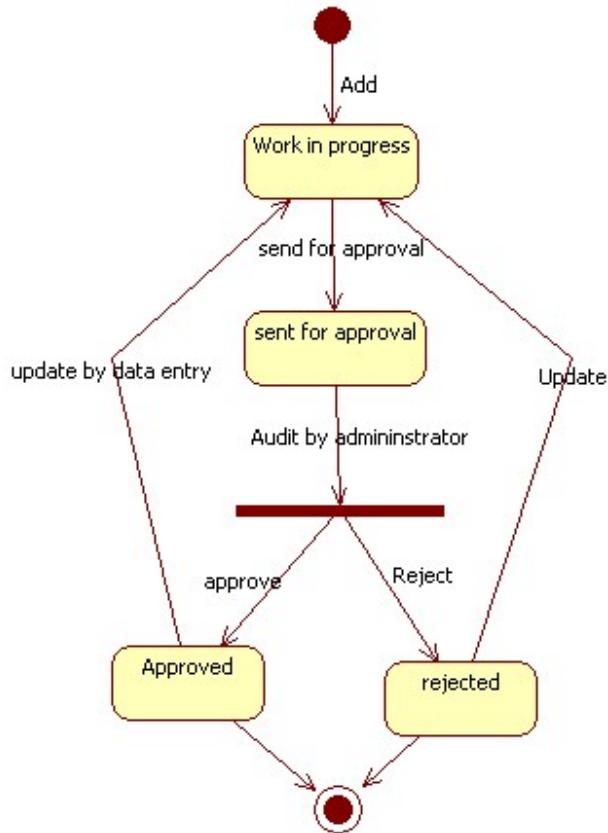

Figure 3 State chart diagram for the objects at environment module

This state chart diagram describes the work flow of the system. AT the first step the object for example **clean agriculture** will be added. After that the data entry will send the object to be approved then the state of the object will be “**sent for approval**”. The administrator will audit the object and then decide either to approve or reject the object. If the object has been approved by the administrator the state of it will be “**Approved**” else it will be “**Rejected**”.

2 Sub Module - Environment Extension Documents

Module Name	Environment extension documents
Module Description	This module contains two types of extension documents (environment pollutions ,recycle wastes)
Reuse	<input type="checkbox"/> Written from scratch <input type="checkbox"/> use external module
Notes	use external module at VERCON To upload the full document of Environment extension documents

2.1 Structure chart / Class diagram for Environment extension documents

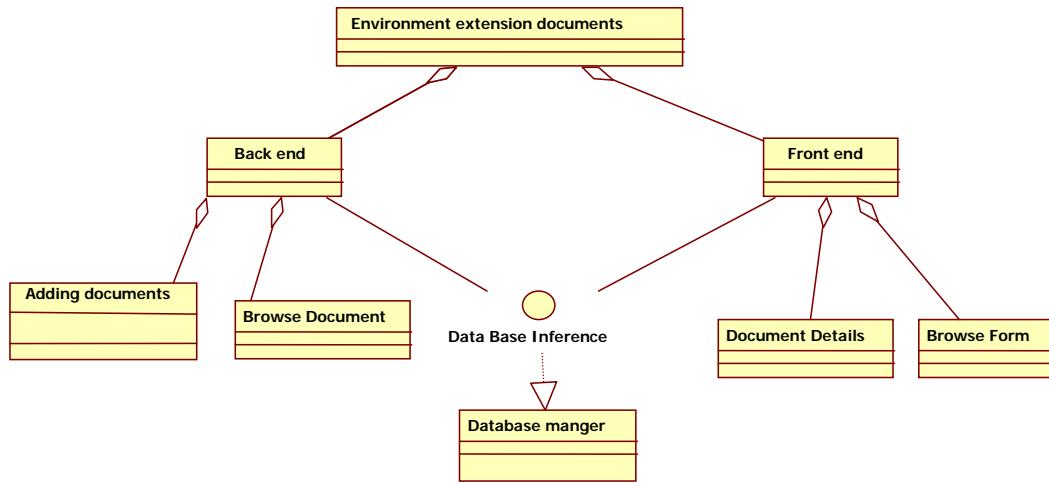

Figure 6 Structured Chart for Environment extension documents

2.2 Portlet: Browsing Environment extension documents form at backend

Portlet Name	Browsing Environment extension documents
Portlet Function	
Reuse	<input type="checkbox"/> Written from scratch
Depends on other Portlets?	no
Depends on Database Tables(VERCONDatabse)	Yes, Books, Users, Status
Source File(s)	All_Nashrate.aspx
Notes	

2.2.1 Component diagram for browsing Environment extension documents

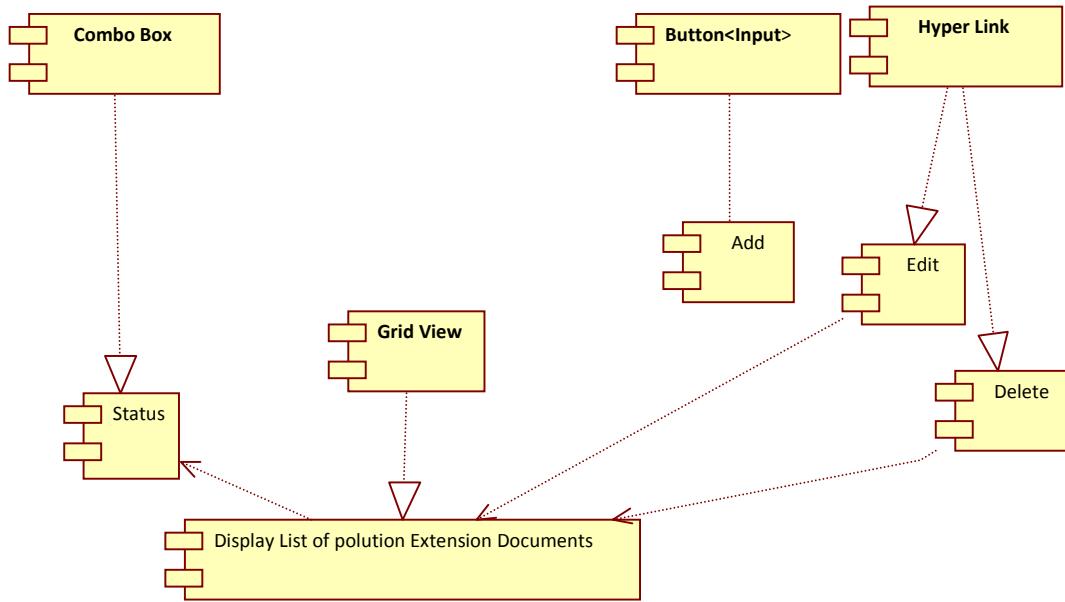

Figure 7 Browse Environment extension documents at backend

2.2.2 Interaction diagram for browsing Environment extension documents

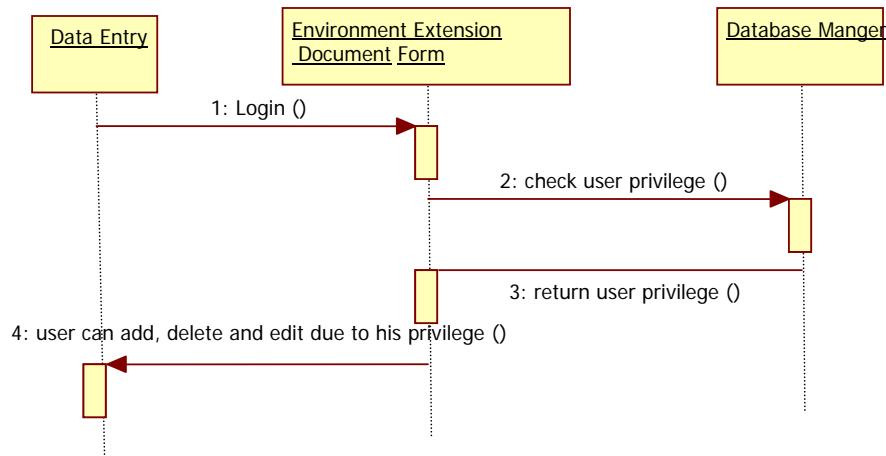

Figure 8 Sequence diagram for browsing Environment extension documents

2.2.3 Graphical user interface

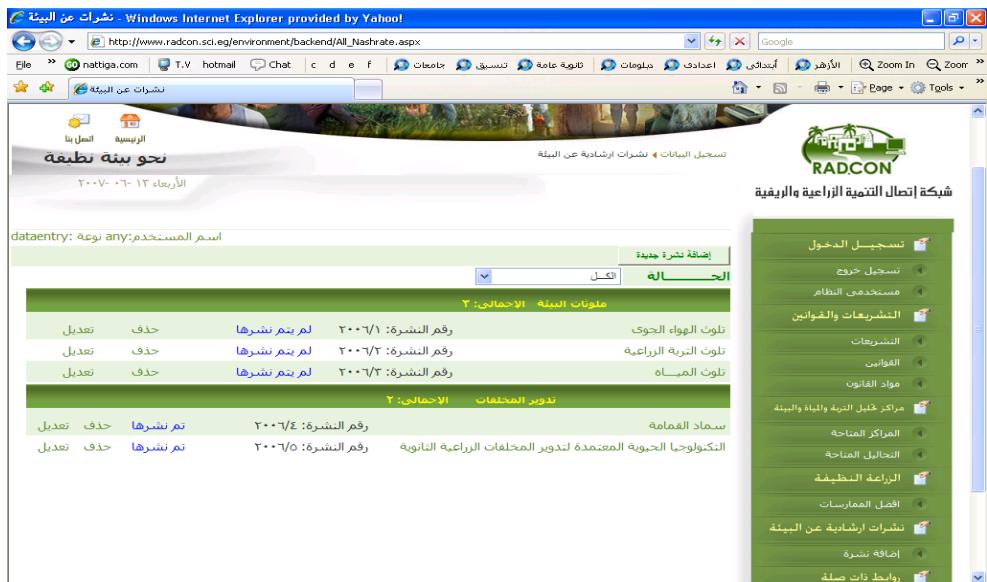

Figure 9 snapshot of search environment extension document

2.2.4 Unit tests

Name	Test Cases
Display Environment extension documents that has status "لم يتم نشرها"	<ol style="list-style-type: none"> 1. Log on the web application 2. Click on "نشرات ارشادية" link 3. Select status "لم يتم نشرها" <p>Expected output: the page should display all Environment extension documents that has been entered and which has not been published yet:</p>
Search for Environment extension documents	<ol style="list-style-type: none"> 1. Log on the web application 2. Click on "نشرات ارشادية" link <p>Expected output: the page should display all Environment extension documents which name contains the search term</p>

2.3 Portlet: Add environment Document Form

Portlet Name	Add new Environment extension documents
Portlet Function	
Reuse	<input type="checkbox"/> Depends on VERCON extension document Module
Depends on other Portlets?	Yes, Browsing Environment extension documents form at backend
Depends on Database Tables	Yes, Books,
Source File(s)	http://www.vercon.sci.eg/aindexui/indexdocayman.asp
Notes	Update VERCON extension document Module for adding Environment extension documents

2.3.1 Component diagram for Environment extension documents form

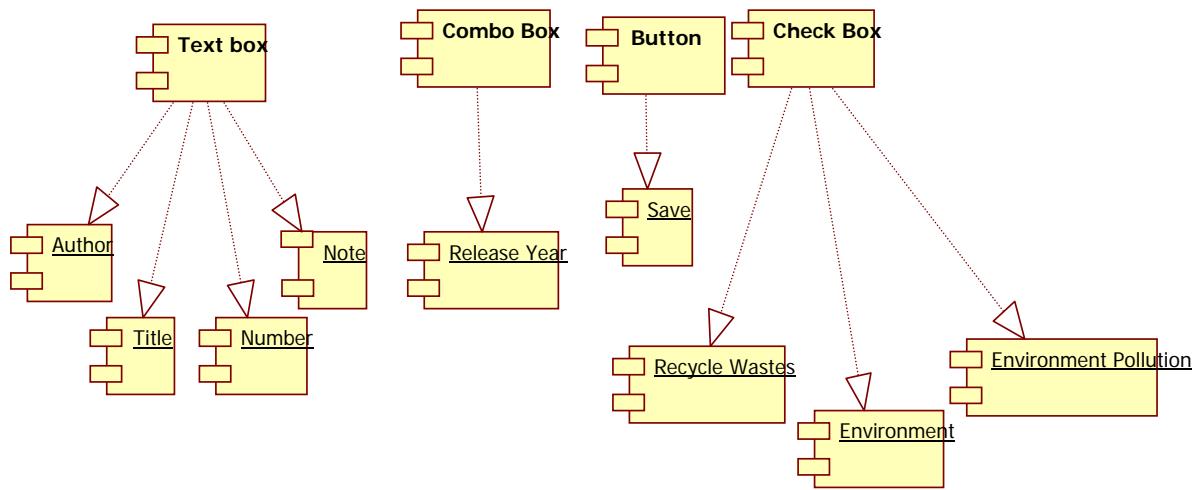

Figure 10 Component diagram for Environment extension documents form

2.3.2 Interaction Diagram

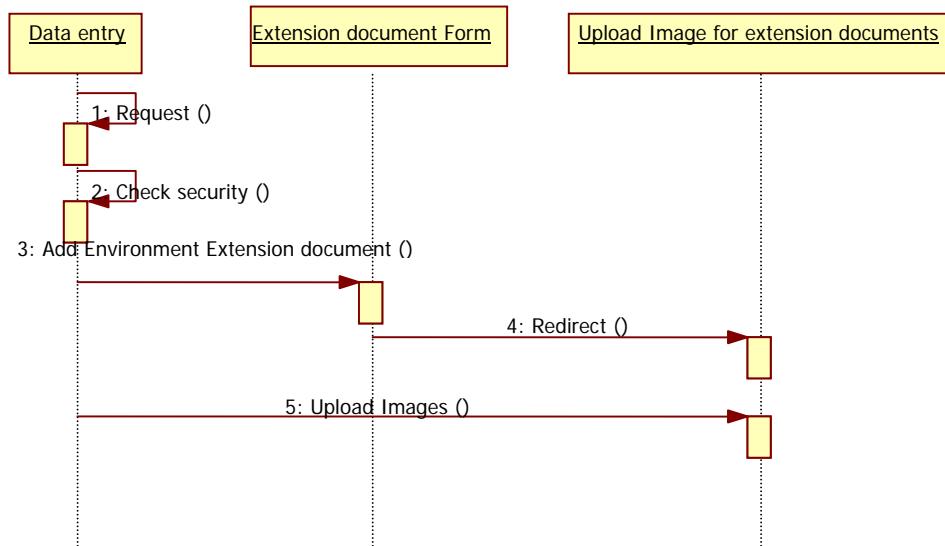

Figure 11 Sequence diagram for adding Environment extension documents

2.3.3 Graphical user interface

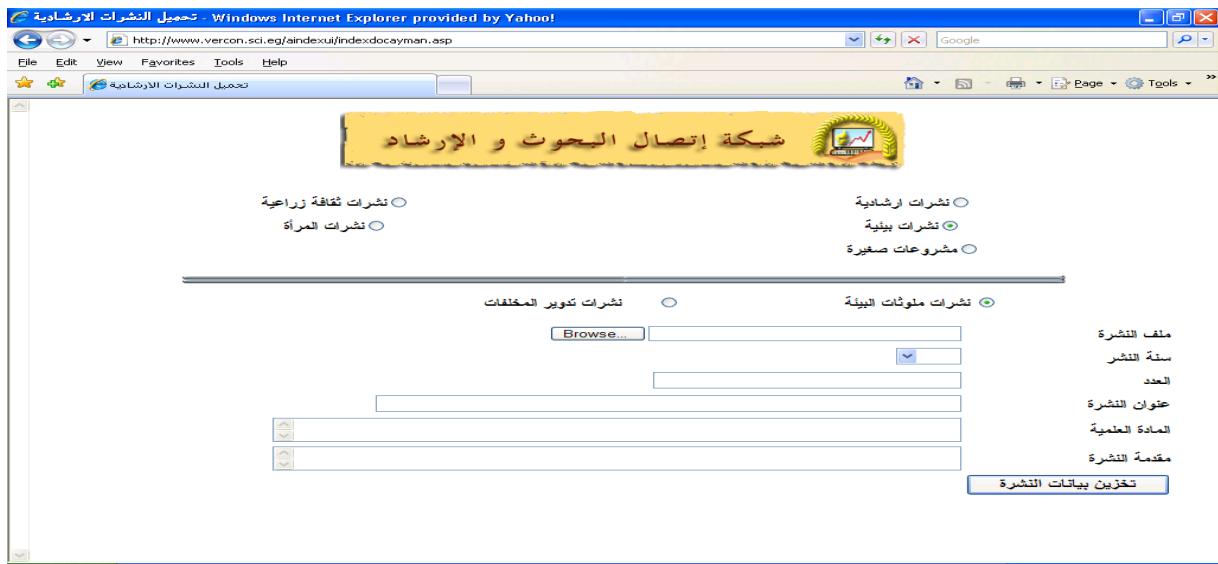

Figure 12 Snapshot for adding new Environment extension documents

2.4 Portlet - Browsing Environment extension documents at Front-End

Portlet Name	Browsing Environment extension documents
Portlet Function	
Reuse	<input type="checkbox"/> Written from scratch
Depends on other Portlets?	no
Depends on Database Tables	Yes, Books, Status
Source File(s)	
Notes	Only the Environment extension documents that has been published will be displayed by this portlet

2.4.1 Component diagram for browsing Environment extension documents

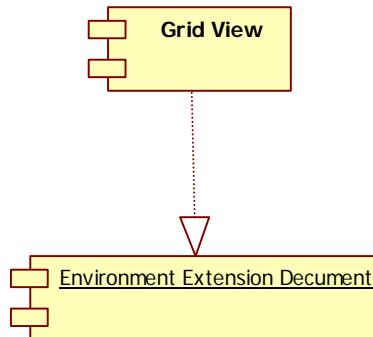

Figure 4 browse Environment extension documents at front-end

2.4.2 Graphical User Interface for browsing Environment extension documents

Figure 5 GUI for browsing Environment extension documents at front-end

2.4.3 Unit tests

Name	Test Cases
Browse published Environment extension documents	<ol style="list-style-type: none"> 1. Add Environment extension documents 2. publish it 3. Got to "نشرات ارشادية للبيئة" page at front end <p>Expected output: progress indication bar appears until processing finishes, then you're directed to the result page</p>

3 Sub Module – Clean Agriculture

Module Name	Clean Agriculture
Module Description	This module contains the best practice which the farmer perform on his field to get a clean and increasing production
Reuse	<input type="checkbox"/> Written from scratch
Notes	

3.1 Structure chart / Class diagram for Clean Agriculture

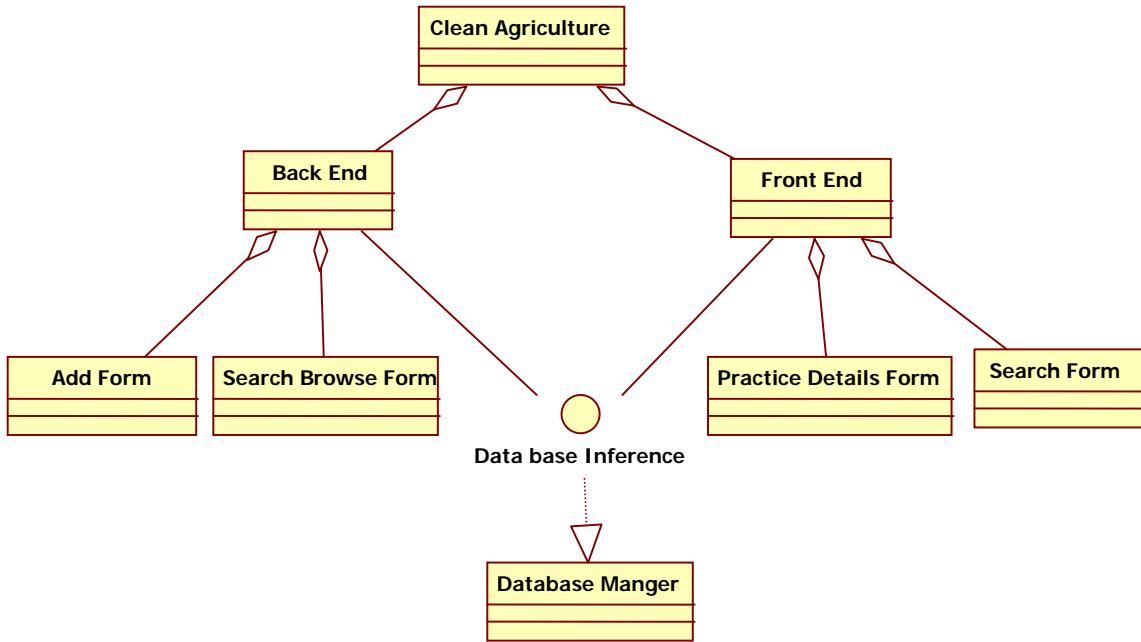

Figure 15 Structured Chart for Clean Agriculture

3.2 Portlet: Browsing Clean Agriculture form at backend

Portlet Name	Browsing Clean Agriculture
Portlet Function	
Reuse	<input type="checkbox"/> Written from scratch
Depends on other Portlets?	no
Depends on Database Tables	Yes, protected_operation, Users, User_types
Source File(s)	All_Practice.aspx
Notes	

3.2.1 Component diagram for browsing Clean Agriculture at Backend

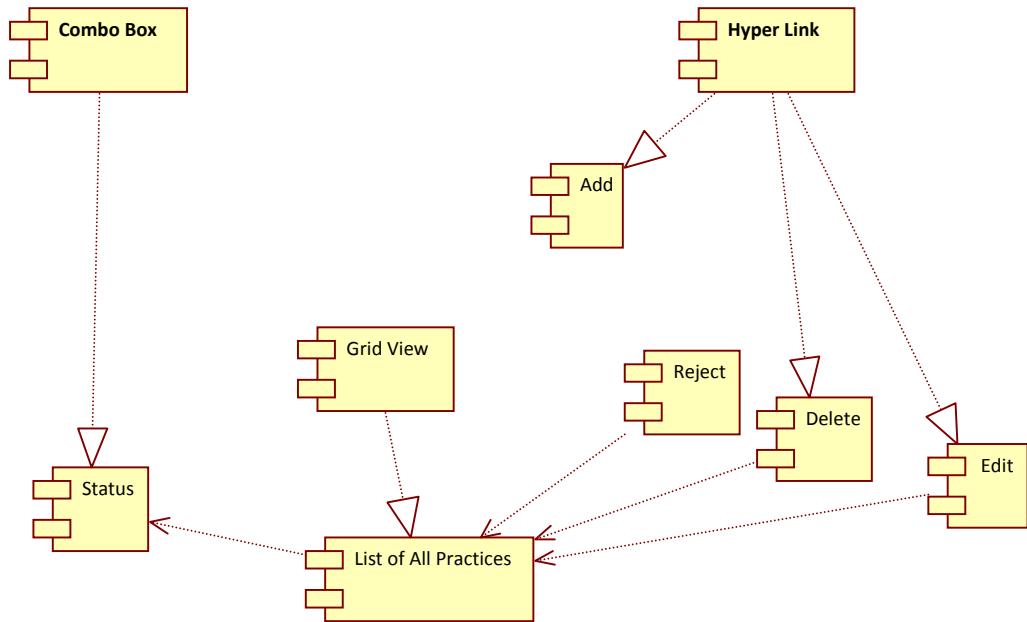

Figure 16 Browse Clean Agriculture at backend

3.2.2 Interaction diagram for browsing Clean Agriculture

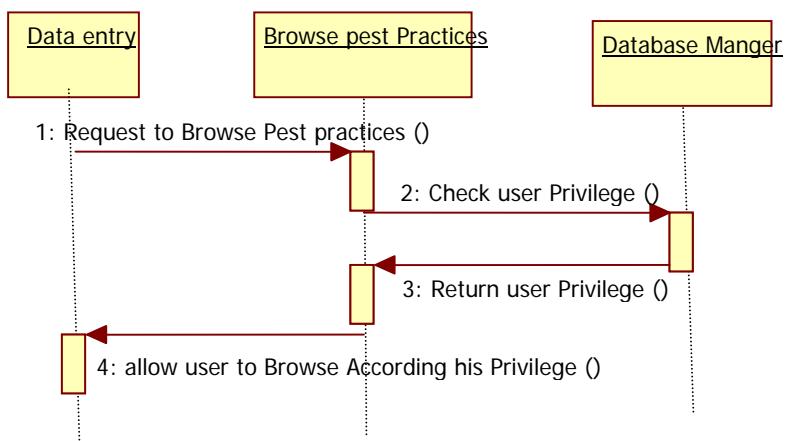

Figure 17 Sequence diagram for browsing Clean Agriculture

3.2.3 Graphical user interface

Figure 18 GUI for browsing Clean Agriculture at front-end

3.2.4 Unit tests

Name	Test Cases
Display Clean Agriculture that has status "لم يتم نشرها"	<ol style="list-style-type: none"> Log on the web application Click on "أفضل الممارسات" link Select status "لم يتم نشرها" <p>Expected output: the page should display all Pest Practices that has been entered and which has not been published yet:</p>
Search for Clean Agriculture	<ol style="list-style-type: none"> Log on the web application Click on "أفضل الممارسات" link <p>Expected output: the page should display Pest Practices which name contains the search term</p>

3.3 Portlet: Add Pest Practice form at backend

Portlet Name	Add Pest Practice
Portlet Function	
Reuse	<input type="checkbox"/> Written from scratch
Depends on other Portlets?	Yes, Browse Clean Agriculture at backend
Depends on Database Tables	Yes, protected_operation, method_protected, Users, User_types
Source File(s)	Add_Protect_Opr.aspx
Notes	

3.3.1 Component diagram for Add Pest Practice at Backend

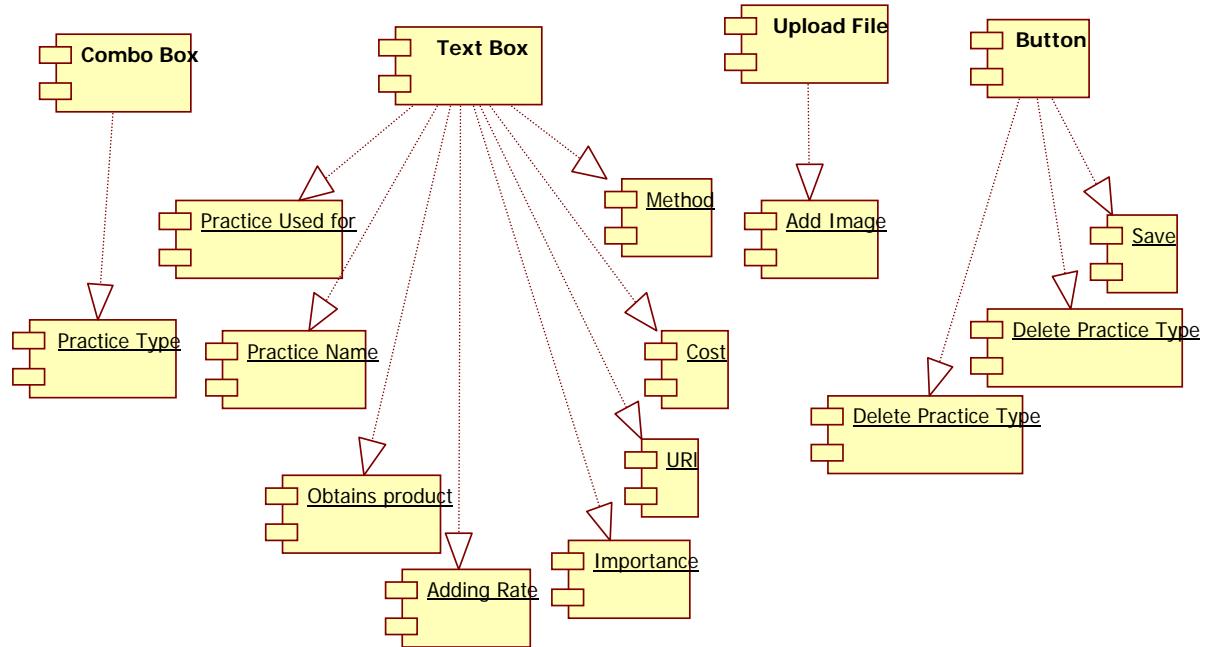

Figure 19 Add Pest Practice at backend

3.3.2 Interaction diagram for Adding Pest Practice

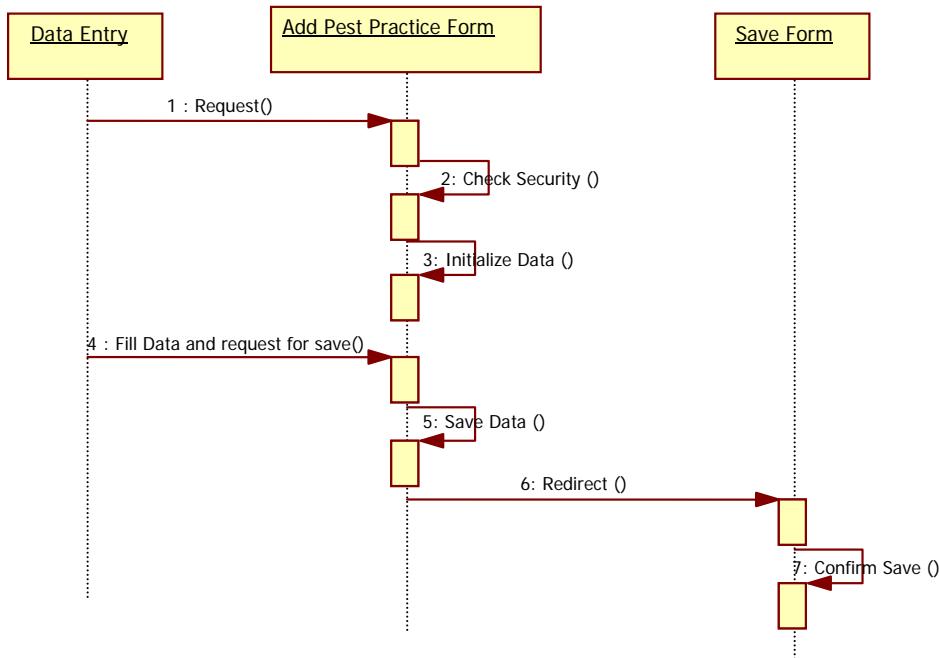

Figure 20 Sequence diagram for Adding Pest Practice

3.3.3 Graphical user interface

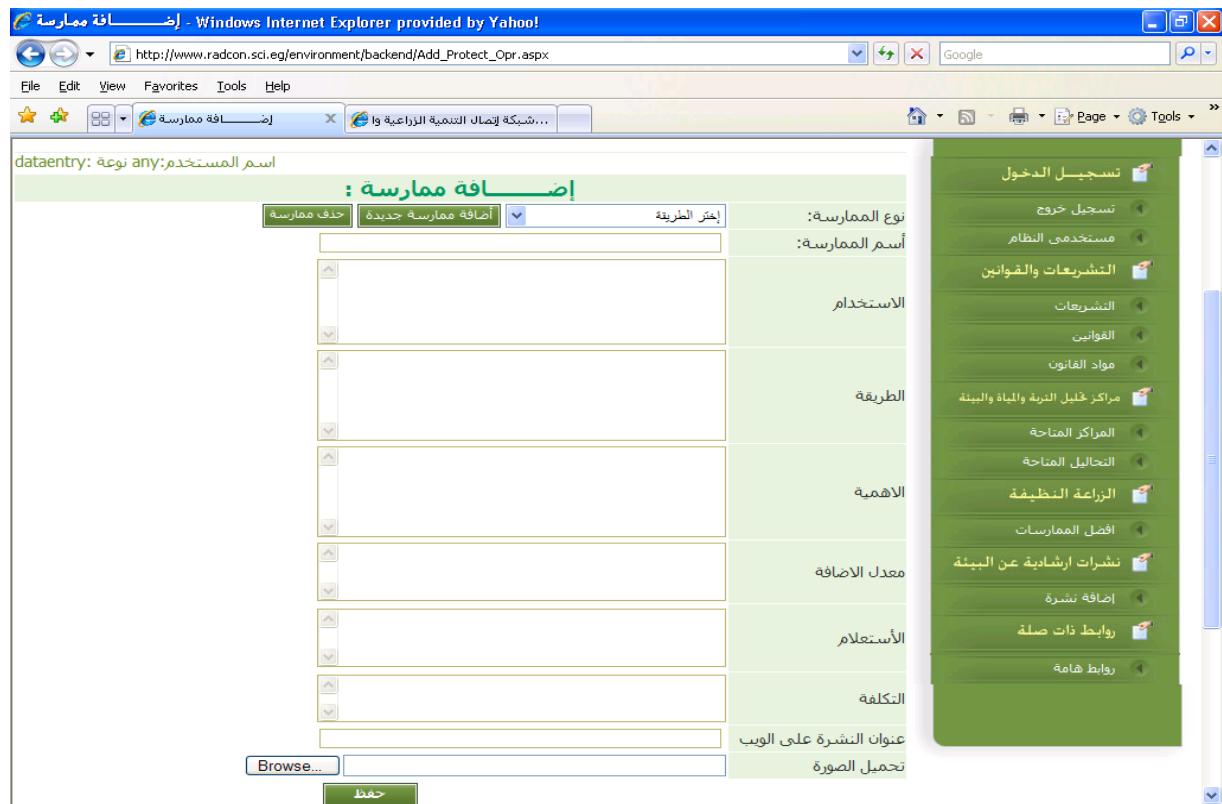

Figure 21 Snapshot for Adding Pest Practice at backend

3.3.4 Unit tests

Name	Test Cases
Adding Pest Practice	Log on the web application 2. Click on الممارسات “أفضل الممارسات” link 3. Click on ‘أضافة ممارسة جديدة’ hyperlink 4. Insert practice data Expected output: progress indication bar appears until processing finishes, then you're directed to the “Pest practices” page

3.4 Portlet - Search Clean Agriculture at Front-End

Portlet Name	Browsing Clean Agriculture
Portlet Function	
Reuse	<input type="checkbox"/> Written from scratch
Depends on other Portlets?	no
Depends on Database Tables	Yes, protected_operation, method_protected , Status
Source File(s)	claenagricultural.aspx
Notes	Only the Pest Practices that has been published will be displayed by this portlet

3.4.1 Component diagram for Search Clean Agriculture

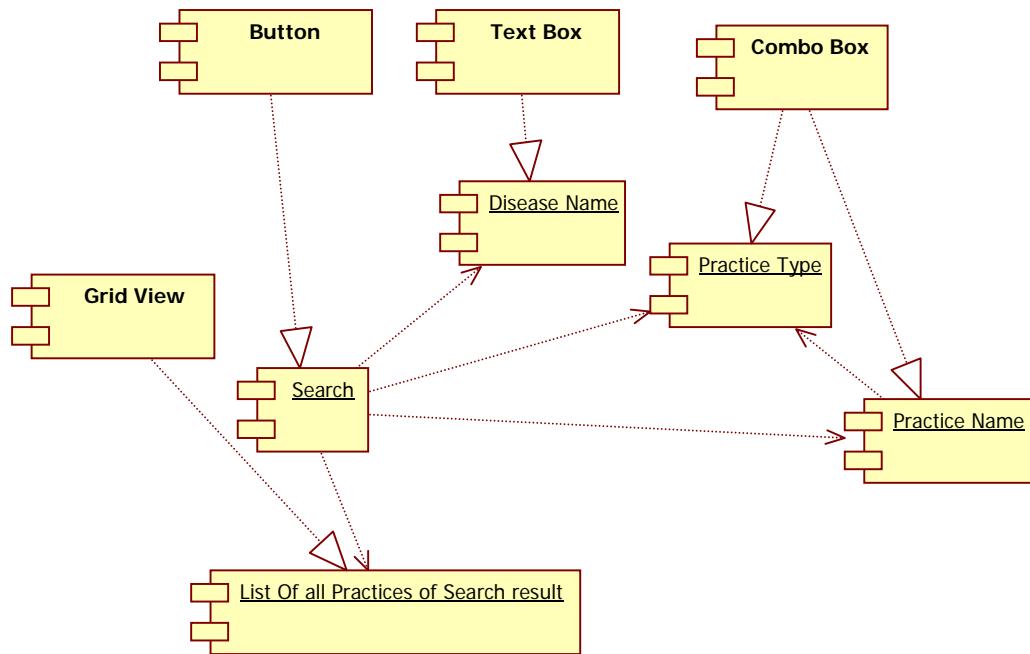

Figure 22 Search Clean Agriculture at front-end

3.4.2 Interaction diagram

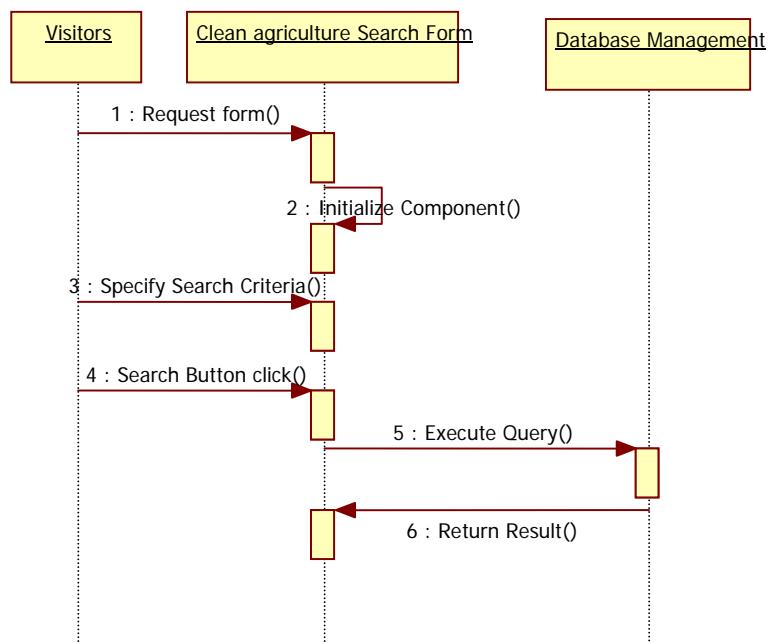

Figure 6 Sequence diagram for Search Clean Agriculture

3.4.3 Graphical User Interface for Search Clean Agriculture

Figure 7 snapshot Search Clean Agriculture

3.4.4 Unit tests

Name	Test Cases
Search Clean Agriculture	<ol style="list-style-type: none"> 1. Add Pest Practice 2. publish it 3. Go to "الزراعة النظيفة" page at front end 4. Select Practice type then click search button <p>Expected output: progress indication bar appears until processing finishes, then you're directed to the result page</p>
	<ol style="list-style-type: none"> 1. select "العمليات الزراعية" from practice type 2. click search button <p>Expected output: practices displayed are</p> <ul style="list-style-type: none"> • التبكير في الزراعة • العزيق • دفن الأحطاب • إزالة الحشائش المعمرة • <ol style="list-style-type: none"> 1. write "اسم الاصفحة" in disease Name 2. click search button <p>Expected output: practices displayed are</p> <ul style="list-style-type: none"> • التبكير في الزراعة • العزيق • إزالة الحشائش المعمرة • (الصابون المتعادل) بداخل البيدات •

3.5 Portlet – Practice Details Form at Front-End

Portlet Name	Display Practice Details
Portlet Function	
Reuse	<input type="checkbox"/> Written from scratch
Depends on other Portlets?	Yes, Search Clean Agriculture
Depends on Database Tables	Yes, protected_operation, method_protected , Status
Source File(s)	claenagriculturalDetail.aspx?PracticeId=14
Notes	Only the Pest Practices that has been Selected to displayed by this portlet

3.5.1 Component diagram for Practice Details Form

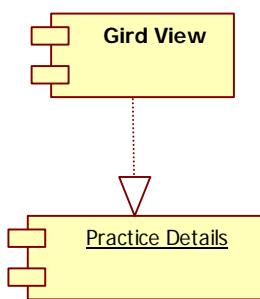

Figure 8 Practice Details Form at front-end

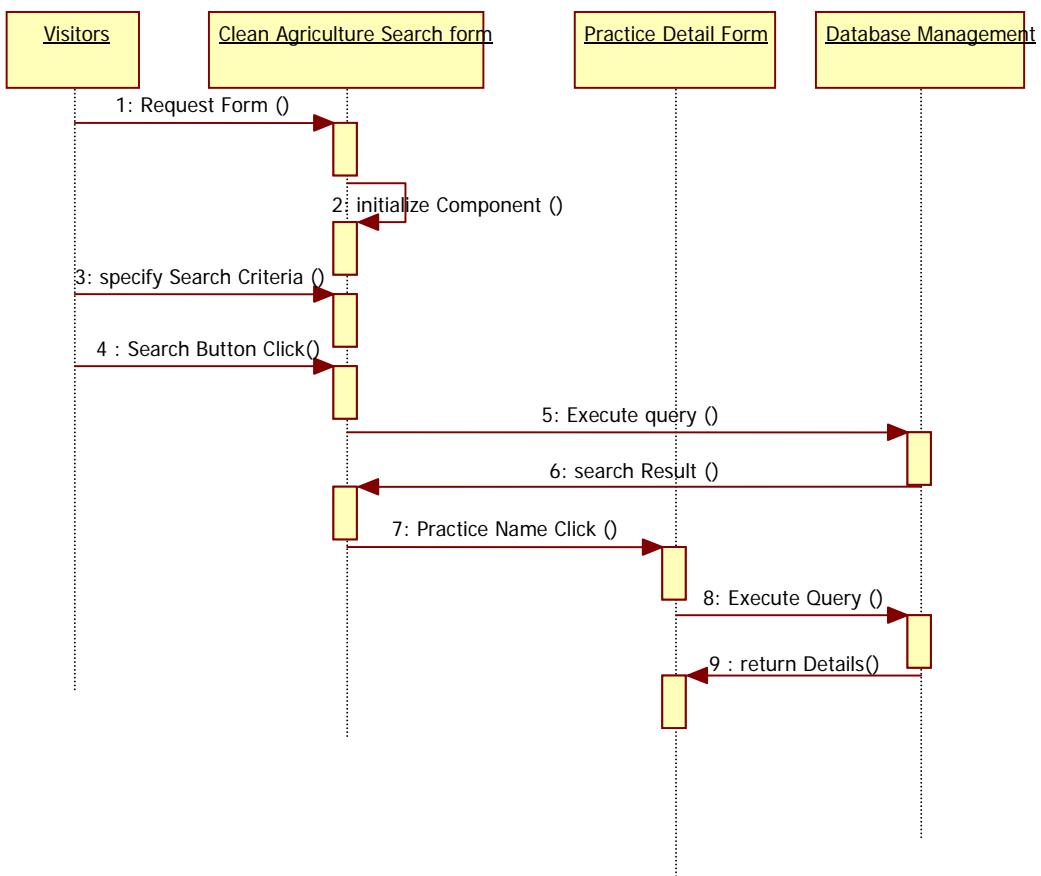

Figure 9 Sequence diagram for Practice Details Form

3.5.3 Graphical User Interface for Practice Details Form

الاستخدام

تسخدم لتنشيط حذور السنات

طريقة التنفيذ:

- * في حالة الري بالغمر يضاف الكمية الخاصة بكل محبس في آخر عشر دقائق من الري.
- * في حالة الري بالغمر يضاف على سطح التربة ثم الري مباشرة.
- * تجنب إضافة التسمافي وفت الطهير ويفصل الإضافة عند الغرب أو في الصباح الباكر.
- * يتم التخزين في أماكن جيدة التهوية وبعيدة عن أشعاع الشمس المباشرة مع تجنّب الحراك في وضع رأسى.

الأهمية:

- * زيادة حجم وتفرع المجموع الجذري مما يعمل على زيادة معدل امتصاص العناصر الغذائية.
- * التقليل في حالة الاحياد في الارضى الملحة.
- * خفض معدل التساقط الطبيعي للارهار وزيادة معدل العقد.
- * التكثير في طرد الشماريخ الراهبة.
- * زيادة معدل تفتح البراعم الساكنة.
- * زيادة العائد من وحدة المساحة المنزرعة.
- المحافظة على نظافة البيئة.

معدل الاضافة:

٥ لتر/ الفدان كل أسبوعان خلال موسم الانتاج

كيفية الاستعلام عن المنتج:

مكتبنظم المتكاملة لتدوير المخلفات الزراعية - معهد بحوث الاراضي والمياه والبيئة
العنوان: ٩ شـ جامعة القاهرة-الجيزة
تـ: (٢٠٢)٥٧٣٠٦٠٨٠

Figure 10 Practice Details Form

3.5.4 Unit tests

Name	Test Cases
Practice Details	<ol style="list-style-type: none"> 1. Add Pest Practice 2. publish it 3. Got to "الزراعة النظيفة" page at front end 4. Select Practice type then click search button 5. Select one of Search Result <p>Expected output: the practice Details Appear</p>

4 Sub Module – Law and Decrease

Module Name	Law and Decrease
Module Description	This module contains the environment laws and their explanation
Reuse	<input type="checkbox"/> Written from scratch
Notes	

4.1 Structure chart / Class diagram for Law and Decrease

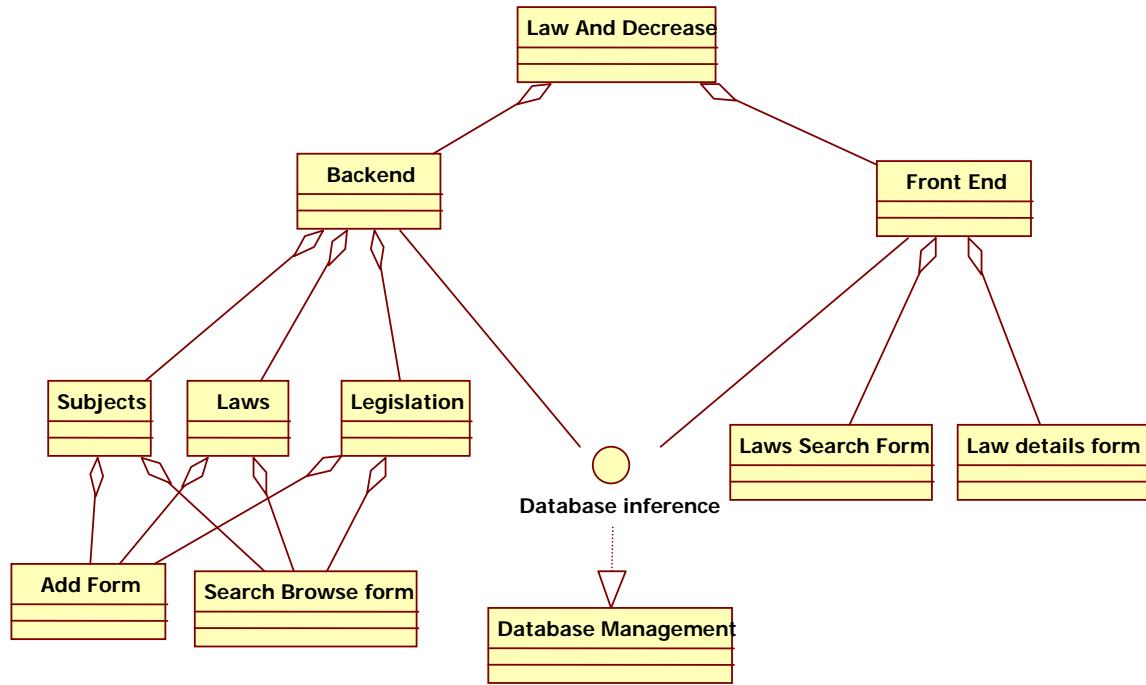

Figure 118 Structured Chart for Clean Agriculture

4.2 Portlet: Browsing Search legislation form at backend

Portlet Name	Browsing Search legislation form
Portlet Function	
Reuse	<input type="checkbox"/> Written from scratch
Depends on other Portlets?	no
Depends on Database Tables	Yes, Eltashriat, Users, User_types
Source File(s)	Tash.aspx
Notes

As the same Search Clean Agriculture sequence diagram

4.3.3 Graphical user interface

A screenshot of a Microsoft Internet Explorer browser window. The title bar reads "التشریفات - Windows Internet Explorer provided by Yahoo!". The address bar shows the URL "http://www.radcon.sci.eg/environment/backend/add_Tashree.aspx". The page content is in Arabic and features a banner at the top with images of farmers working in fields and people in an office. Below the banner, there's a navigation menu with links like "الرئيسية", "الملحقات", and "الخدمات". A large green button labeled "اصنافه تشریع" (Types of Law) is prominent. To the right, there's a sidebar with a logo for "RADCON" and a list of links related to environmental laws and regulations.

Figure 33 Snapshot for Adding legislation at backend

4.3.4 Unit tests

Name	Test Cases
------	------------

Adding legislation	Log on the web application 2. Click on “التشريعات” link 3. Click on ‘أضافة تشريع جديد’ hyperlink 4. Insert legislation data
Expected output: progress indication bar appears until processing finishes, then you're directed to the “legislation” page	

4.4 Portlet: Browsing Search law form at backend

Portlet Name	Browsing Search law form
Portlet Function	
Reuse	<input type="checkbox"/> Written from scratch
Depends on other Portlets?	no
Depends on Database Tables	Yes, Eltashriat, Lows, Users, User_types
