Report on Identifying Resource Poor Communities in Some Egyptian Governorates

Background and Justification:

The World Food Summit (WFS) held in Rome in 1996 committed FAO member states to the 2015 goal of reducing food insecurity by half. To meet the target of halving malnutrition in developing countries by 2015, this number needs to be cut by at least 20 million per year. With a growing world population, this situation may even worsen unless very determined and well-targeted actions are taken to improve food security. The Millennium development goals further highlight the importance of confronting the scourge of poverty and the despair of food security.

Therefore, there is a need to reconceptualize and reprioritize extension services and promote communication for rural development activities within the framework of the food security challenge. For the foreseeable future, dealing with poverty and hunger means confronting the problems that small farmers and their families face in their daily struggle for survival.

Agricultural extension continues to be in transition worldwide. Governments and international agencies are advancing structural, financial and managerial reforms to improve extension, decentralization, pluralism, cost sharing, cost recovery, participation of stakeholders in development initiatives and the decisions and resources that affect them.

A number of policy recommendations were put by the international workshop on “Extension and Rural Development” jointly hosted in November 2002 by the World Bank, The USAID, and the Neuchatel Group. These recommendations were: government should focus public financing on the poor, government should view extension within a wider rural development agenda, government should develop a stakeholder coordinating mechanism, government should build capacity of rural producers’ organizations, the public sector, and service providers.

In this context, FAO in collaboration with the Ministry of Agriculture and Land Reclamation in Egypt initiated a project to establish “Rural and Agricultural Development Communication Network” (RADCON) that build on the success of “Vertical Extension and Research Communication Network” (VERCON) to benefit farm families and their communities from an information system, which is operated by agricultural extension in collaboration with the national agricultural research system.

The Objective of the Study:

To identify fifty resource poor communities and connected them to the RADCON information system and its activities.

Methodolgy

Study Population:

According to the data mentioned in table No. (1) this study was conducted in 177 villages. These villages affiliated to Thirty nine extension centers in six governorates in addition to Noubaria region. The activities of VERCON project are implemented through these extension centers at the village level. These 177 villages could be classified as follows: Fifty five villages in Kafr Al-Shiekh governorate, Fourty nine villages in Assuit governorate, fifteen villages in Noubaria region, thirteen villages in Fayoum governorate, Seven villages in Ismsilia governorate, Thirty three villages in Beheira governorate and five villages in Dakahlia governorate.

Data Collection Tool:

A questionnaire was designed to select the fifty poor communities using indicators regarding Population, village infrastructure, agricultural activities, local organizations and current rural developmental projects in the village.

The questionnaire included the following items:

Geographical location: village name, district, extension center and governorate, distance between village and district capital, distance between village and governorate capital, total area, cultivated area, cropping area and not exploited area.

Population estimation and projection: Male and female village population, number of households, average of family members, male and female illiteracy percentages, percentage of population who got university certificate, percentage of population who got secondary certificate, percentage of population who got less than secondary certificate, percentage of population working in production activities, percentage of population working in service activities.

Village infrastructure: Sewage method, garbage disposal method, stability of electric current, length of paved roads, length of dusty roads, number of phone lines in the village, number of personal computers available in the village, ease and availability of transportation.

Agricultural activities: The main crops and averages of productivity per feddan, average of farm size, number of farm holders, number of landless labor, agricultural machines available in the village, categories of cultivated area according to soil fertility, numbers of different kinds of animal husbandry, average of feddan price, average of feddan rental value per year, total value of loans received by farmers in the last year, percentage of farmers refunding loans and total value of population savings in the village bank.

Local organizations available in the village or in the near villages:

These organizations are as follows: Local council, police station, post/telegram office, health care unit, veterinary unit, hospital, private clinics, pharmacy, medical analysis lab, communication center, primary school, preparatory school, secondary school, village bank, agricultural cooperative, community development society, extension center, youth club, cyber coffee, Ngos.

Current developmental projects in the village: This item included the international, national and local projects implemented in the village.

Data Collection:

Field data were collected in November and December 2004 by extension center directors who were trained for two days by the national consultant of the study. Data were tabulated and analyzed by using the following indicators in order to select the targeted fifty poor communities.

Indicators

- **Intensification factor = Cropping area/ Cultivated area.**
(2 and more = 3, 1-less than 2 = 2, less than 1 = 1)
- **Percentage of non-exploited area = Non exploited area/ Village total area.**
(less than 5%= 3, 5%-less than 10% = 2, 10% and more = 1)
- **Average of farm size = cultivated area/number of farm holders.**
(5 feddans and more = 3, 2-less than 5 feddans = 2, less than 2 feddans = 1)

Population Estimation and Projection:

- **Average of family members = Total number of village population/Total number of families.**
(less than 5 individuals = 3, 5-less than 8 individuals = 2, 8 individuals and more = 1)
- **Percentage of population who got university certificate:**
(10% and more = 3, 5-less than 10% = 2, less than 5% = 1)
- **Percentage of population who got secondary certificate:**
(less than 15% = 3, 15%-less than 30% = 2, 30% and more = 1)
- **Percentage of population who got less than secondary certificate:**
(less than 15% = 3, 15%-less than 30% = 2, 30% and more = 1)
- **Percentage of population working in production activities:**
(75-100% = 3, 50-less than 75% = 2, less than 50% = 1)
- **Percentage of population working in service activities:**
(20% and more = 3, 10-less than 20% = 2, less than 10% = 1)

Village Infrastructure:

- **Sewage method:**
(sewage network = 2, lowering ground water level = 2, sewer = 1)
- **Garbage disposal method:**
(collecting and burning = 2, recycling = 2, interment =2, collecting infront of homes =1)
- **Electric current:**
(Stable = 2, Unstable = 1)
- **Percentage of paved roads = length of paved roads/length of village roads x 100.**
(66.7-100% = 3, 33.3-less than 66.7% = 2, less than 33.3 = 1)

- **Number of telephone lines per family = Total number of telephone lines/total number of families.**
(1 line and more = 3, 0.5-less than 1 line = 2, less than 0.5 line= 1).
- **Percentage of families has personal computers = Total number of personal computers/total number of families x 100.**
(1% and more = 3, 0.5-less than 1% = 2, less than 0.5% = 1)
- **Ease of transportation:**
(Easy = 3, Reasonable = 2, Difficult = 1)
- **Availability of transportation:**
(Available continuously = 3, Available sometimes = 2, Rarely available = 1)

Agricultural activities:

- **Percentage of high value crop area: Total of high value crop area/cultivated area x 100. The high value crops are: ornamental and medical plants, rice, vegetables, fruits, chick-pea.**
(66.7%-100% = 3, 33.3%-less than 66.7% = 2, less than 33.3% = 1)
- **Percentage of medium value crop area: Total of medium value crop area/cultivated area x 100. The medium value crops are: date palm, lentils, figs, onions, sugar-beet, green fodders, clover, sesame, sunflower, peanuts, trigonella.**
(66.7%-100% = 3, 33.3%-less than 66.7% = 2, less than 33.3% = 1)
- **Percentage of low value crop area: Total of low value crop area/cultivated area x 100. The low value crops are: sugar can, wheat, faba been, cotton, maize, barely, sorghum, linen.**
(66.7%-100% = 1, 33.3%-less than 66.7% = 2, less than 33.3% = 3)
- **Average of landless labor per feddan = number of landless labor/number of farm holders.**
(less than 3 individuals = 3, 3-less than 6 individuals = 2, 6 individuals and more = 1)
- **Average of agricultural machines per feddan = Total number of agricultural machines/cultivated area.**
(2 units and more = 3, 1-less than 2 units = 2, less than 1 unit = 1)
- **Percentage of soil fertility = Total area of fertile soil/cultivated area x100.**
(66.7%-100% = 3, 33.3%-less than 66.7% = 2, less than 33.3% = 1)
- **Approximate number of cows:**
(1000 and more = 3, 500- less than 1000 = 2, less than 500 = 1)

- **Approximate number of buffalos:**
(1000 and more = 3, 500- less than 1000 = 2, less than 500 = 1)
- **Approximate number of goat and sheep:**
(1000 and more = 3, 500- less than 1000 = 2, less than 500 = 1)
- **Approximate number of camels:**
(50 and more = 3, 25- less than 50 = 2, less than 25 = 1)
- **Number of poultry farms:**
10 farms and more = 3, 5-less than 10 farms = 2, less than 5 farms = 1)
- **Average of approximate feddan price:**
(L.E. 100,000 and more = 3, L.E. 70,000-less than 100,000 = 2, less than L.E. 70,000 = 1)
- **Average of approximate feddan rental value per year:**
(L.E. 3000 and more = 3, L.E. 1500-less than 3000 = 2, less than L.E. 1500 = 1)
- **Loan average per farmer:**
(L.E. 3000 and more = 3, L.E. 1000-less than 3000 = 2, less than L.E. 1000 = 1)
- **Percentage of farmers refunding loans:**
(75-100% = 3, 50-less than 75% = 2, less than 50% = 1)
- **Average of individual savings in the village bank:**
(L.E. 100 and more = 3, L.E. 50-less than 100 = 2, less than L.E. 50 = 1)
- **Local organizations available in the village = 3**
- **Local organizations available in the near villages = 2**
- **Local organizations inavailable = 1**
- **Current developmental projects in the village:**
(International projects = 3, national projects = 2, local projects = 1)

Scores of each village were added to present the village weight regarding its poverty level. The villages in each governorate were ranked in ascending order according to the total degrees of indicators. The number of selected villages in each governorate was determined according to the percentage representing governorate villages in the study population.

Results

The following tables from No. (2-8) clarified the villages in each governorate arranged in ascending order according to the total degrees of used indicators.

The fifty poor communities were selected by using the certified sample in each governorate as shown in table no. (9). These villages were distributed as follows: Fourteen villages in Kafr Al-Shiekh governorate, fourteen villages in Assuit governorate, four villages in Noubaria region, four villages in Fayoum governorate, three villages in Ismailia governorate, nine villages in Beheira governorate and two villages in Dakahlia governorate.

Tables from No. (10-16) revealed the selected poor communities in each governorate.

Table No. (2) Arranging the Villages in Kafr Al- Shiekh Governorate According to The total Degrees of Indicators

No.	Village	District	Governorate	Total Degrees
1	Kafr Al-Taifa	Kafr Al-Shiekh	Kafr Al-Shiekh	80.70
2	Al-Banah	Al-Hamoul	Kafr Al-Shiekh	94.25
3	Kafr Al-Manshi	Kafr Al-Shiekh	Kafr Al-Shiekh	96.25

Community Profile Of Kafr Al-Taifa Village

General Data :

- **Village:** Kafr Al-Taifa .

- **Administrative affiliation:** Kafr Al-Shiekh.

- **Governorate :** Kafr El-Shiekh

- **Location:** The village is 5 km from the district capital and 5 km from the governorate capital.

- **Village total area:** 7 Km².
- **Cultivated area:** 1426 feddans.
- **Cropping area:** 2852 feddans.
- **Not exploited area:** 6 feddans.
- **Average of farm size:** 1.4 feddans.

Population Estimates and Projection:

- **Village Population:** 5670 males and 6010 females.
- **Households:** 1150 families.
- **Average of family members:** 10.2 individuals.
- **Illiteracy percentage:** males: 8% and females: 11%.
- **Percentage of population who got university certificate:** 5%.
- **Percentage of population who got secondary certificate:** 20%.
- **Percentage of population who got less than secondary certificate:** 12%.
- **Percentage of population working in production:** 64.9%.
- **Percentage of population working in service activities:** 10.6%.

Village Infrastructure:

- **Sewage method:** sewer.
- **Garbage disposal method:** Collecting and burning.
- **Electric current:** unstable.
- **Percentage of paved roads:** 66.7%
- **Number of telephone lines per family:** 0.6 line
- **Number of personal computers per family:** 0.01 PC
- **Ease of transportation:** reasonable
- **Availability of transportation:** sometimes available

Agricultural Activities:

- **Percentage of high value crop area:** 31.6%
- **Percentage of medium value crop area:** 1.9 %
- **Percentage of low value crop area:** 41.0%
- **Average of landless labor per feddan:** 3.6 individual
- **Average of agricultural machines per feddan:** 0.8 unit

- **Percentage of soil fertility: 100%**
- **Approximate number of cows: 900 Cows**
- **Approximate number of buffalos: 600 buffalos**
- **Approximate number of Goat and Sheep: 250 animals**
- **Approximate number of Camels: none**
- **Number of poultry farms: 4 farms**
- **Average of approximate feddan price: LE 110,000**
- **Average of approximate feddan rental value per year: LE 3,800**
- **Loan average per farmer: LE 2,800**
- **Percentage of farmers refunding loans: 97%**
- **Average of individual savings in the village bank: LE 18**

Local organizations available in the village:

- **Post/telegram office.**
- **Health Care Unite.**
- **One private clinic.**
- **Two pharmacies.**
- **Three communication centers.**
- **Primary school.**
- **Preparatory school.**
- **Agricultural cooperative.**
- **Community development Society.**
